CONSTRUCTION MANAGEMENT  
FOR HEAVY CIVIL CONTRACTORS

A background image showing two construction workers in safety gear standing on a dirt mound at sunset. The sky is a mix of orange, yellow, and blue. There are decorative dotted lines in blue and yellow with arrowheads pointing right, one at the top and one at the bottom.

# ONE. CONNECTED. PLATFORM.

## **ONE FOR ALL AND ALL FOR DATA**

Whether you're in the field, at the office, or on the road, the Tractics platform has something that will make everyone's day more productive. Our product's focus lies between estimating and accounting and is aimed at improving overall project efficiencies through integrated applications and features. Our integrated applications take advantage of Tractics Common Data Environment, providing real-time access to critical project details across the platform. With this data, you gain valuable schedule and production insights geared to improve your company's overall performance. Sounds really good, doesn't it? If you're ready to ditch your ineffective systems and step up to a powerful management machine, Tractics can help.

CONSTRUCTION  
MANAGEMENT  
PLATFORM

# THE PLATFORM FOR TODAY'S CONTRACTOR

“After spending my entire career in heavy construction and not finding any software that truly fit my business, we finally built one that actually works for this industry.”

Bryce Ricklefs  
Chairman

## COMPREHENSIVE AND AFFORDABLE

Figuring out which combination of costly software packages you need to run your business, is painful. But, it doesn't have to be like that. Tractics is an affordable, all-in-one, construction management solution that includes:

Crew and foreman applications to manage time and track tasks.

Manage project details from bid to close, improve efficiency and reducing risk.

Track your equipment schedules, and gain real-time insights into asset utilization.

TRACTICS CONSTRUCTION MANAGEMENT PLATFORM

## CONNECT THE DOTS

Getting the job done right and on time requires access to real-time data to keep projects moving and on track. Tractics Common Data Environment gathers project data from across the Tractics platform and makes it easily available to crew in the field, management and dispatchers at the office, and operators on site.

“ The working side of the industry has outpaced its management technology; data, throughput, and visibility are the new level-up factors.

Tyler VanWinkle  
CEO

# IN THE FIELD

At Tractics, we took a “Field First” approach to product development. Working in the field with crews, we gathered a deep understanding of what worked, identified shortcomings, and used that input on new, easy-to-use crew and foreman applications for the field.

“I’ve used other systems, and we typically used 1/5 of the functionality offered. Tractics is on point, easy to use, and a great resource for any Project Management Team.

Tim Turner  
Project Manager

## MANAGING CREWS HAS NEVER BEEN EASIER, OR SMARTER.

### FOREMAN APP FEATURES

- Project Dashboards
- Daily Task Management
- Crew + Hours Management
- Quantity by Bid Item & Cost Code
- Field Notes w/ Pics By Project and By Task
- Submission to PM
- Analysis by Task
- Prevailing Wage
- Emergency Services Map
- Real-Time Production (Over/Under)
- Real-Time Crew & Equipment On-Site Display
- Kiosk Mode
- Equipment/Crew Move Requests

### FOREMAN DASHBOARD

Project dashboards offers foreman and supervisors real-time visibility into a project’s status, crew, equipment on site, and more.

### TIME & TASK MANAGEMENT

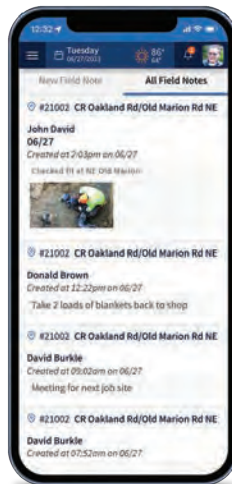

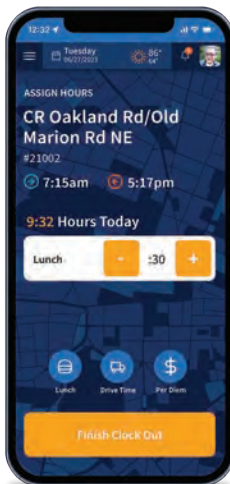

With the Tractics foreman app, reviewing, commenting, and approving timesheets is just a tap away.

## FIELD-TESTED. CREW APPROVED.

### CREW APP FEATURES

- Geo-fence Aware
- Jobsite Notifications
- Project Clock-In/Out
- Drive Time Tracking
- Per Diem/Lunch
- Project Contacts
- Photos & Comments
- Project Documents
- Emergency Services

### LOG TIMESHEETS

Skip the paper chaos and easily access your timesheet logs, all from the palm of your hand.

### PROJECT NOTES

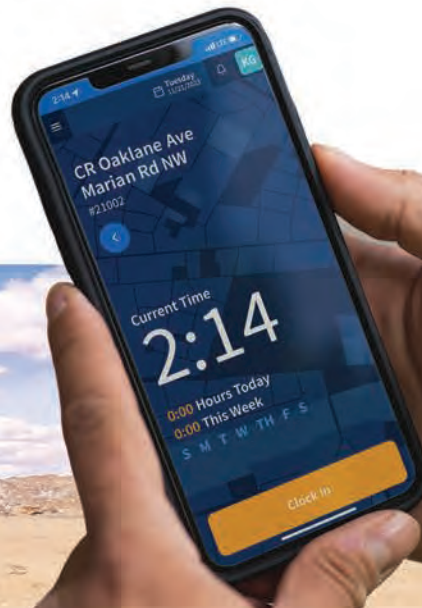

Document project-related issues, observations, or provide visual updates with photos.

### ALWAYS IN SYNC

Submitted crew hours are sent directly to the foreman to ensure coordination and accuracy.

### EASIER TIME ENTRY

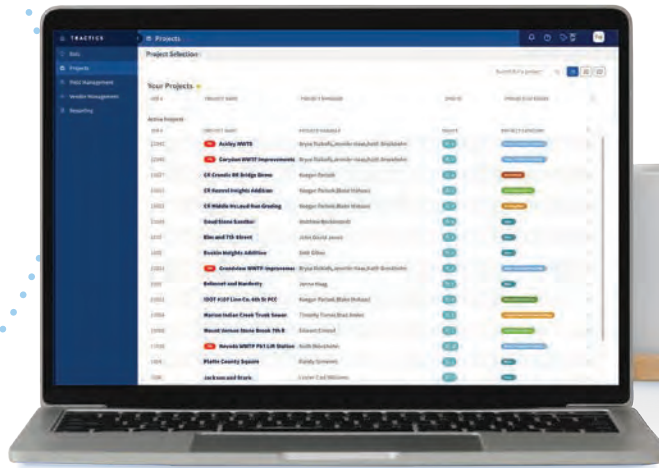

Click in, click out and easily track per diem, lunch and drive time, all with a tap.

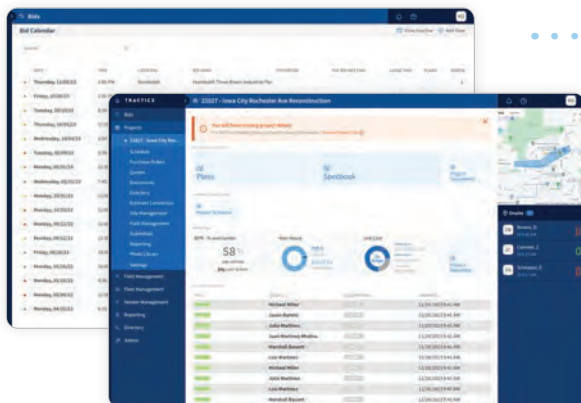

# AT THE OFFICE

The Tractics platform gives project management and leadership real-time visibility into a project's status, productivity, and resource availability. Insights that improve overall communication and help ensure a successful project, from start to finish.

## MANAGEMENT FEATURES

- User Configuration
- Bid Management
- Geo-fence Management
- Daily Field Logs
  - Quantities
  - Tasks
  - Hours
  - Notes
  - Pictures
- Bid Item & Cost Code Configuration
- Takeoffs
- Estimate Conversion
- Edit, Add, Approve Logs
- Job Tracking Reports
- Cross Job Reporting
- Timesheet Management
- Foreman Hours Summary
- Payroll Exports
- Reports Per Project, Task, Person, Overtime
- Crew & Equipment On-Site
- Foreman's Preset Task List
- Payroll & Project Data

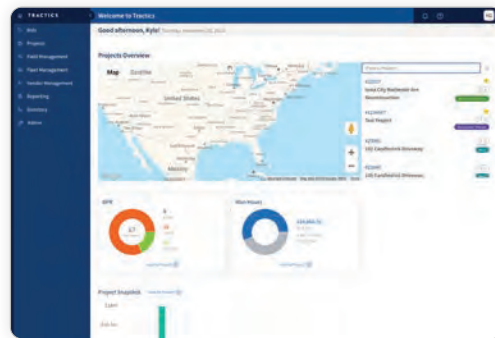

## FROM START TO FINISH

From bid to project completion, Tractics ensures that every aspect of the job is not only tracked but streamlined, providing construction companies with the tools they need for success.

## PRODUCTIVITY, AT A GLANCE

The Tractics dashboard provides a quick snapshot of your company's performance across all projects, keeping you informed and allowing you to quickly identify areas for improvement.

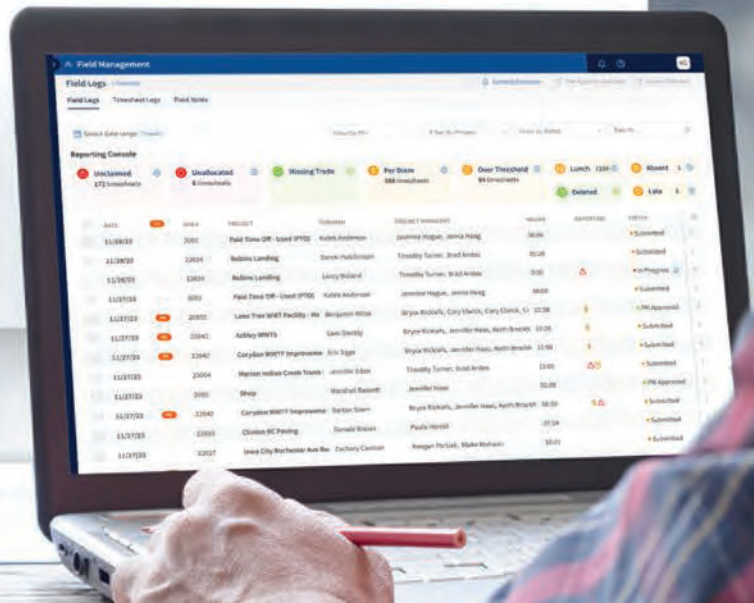

## COMPREHENSIVE REPORTING

From project summaries to unallocated time reports, Tractics gives you the ability to run a variety of project and company-wide reports, ensuring a well-rounded view of your operation.

## TIME MANAGEMENT, STREAMLINED

Effortlessly manage time with accurate and detailed field logs submitted by the foremen, allowing for quick review and approval for payroll.

A screenshot of the Tractics Field Management dashboard. It shows a table of field logs with columns for date, time, location, and status. The table is filtered by 'Unallocated' and 'Missing Time'. The dashboard includes a sidebar with navigation options and a table of field logs at the bottom.

Date	Time	Location	Status	Submitted By	Approved By	Status
11/28/19	2000	Field Time DR - Sand PTSD	Unallocated	Kyle Anderson	Jessie Hagan, Jenni King	Submitted

11/27/19	2300	Lower Tree W&E Facility	Unallocated	Jessie Hagan	Bryce Rickard, Kyle Anderson	Submitted

# ON THE ROAD

Tractics beacons and telematics provide real-time asset data for location, performance, driver behavior, and maintenance. Data insights can help you optimize trips, reduce fuel costs, and improve overall efficiency going forward.

## CAN YOU AFFORD NOT TO USE TRACTICS FLEET MANAGEMENT?

Tractics fleet management with telematics offers numerous benefits that reduce operating costs and improve fleet performance. Ultimately leading to greater profitability.

**RESOURCE VISIBILITY**

**THEFT PREVENTION & RECOVERY**

**ENHANCED SAFETY**

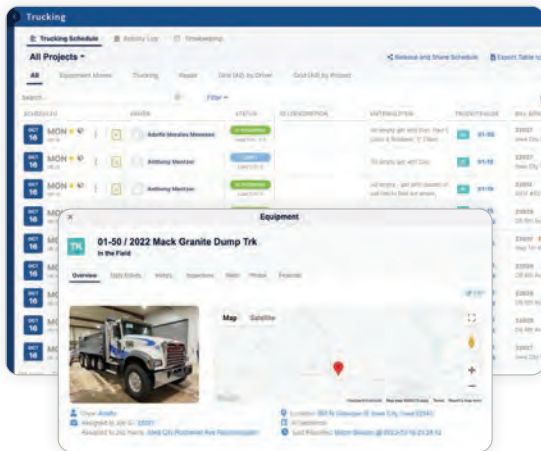

**TIMELY MAINTENANCE**

**MONITORING & REPORTING**

## FLEET MANAGEMENT & TELEMATICS

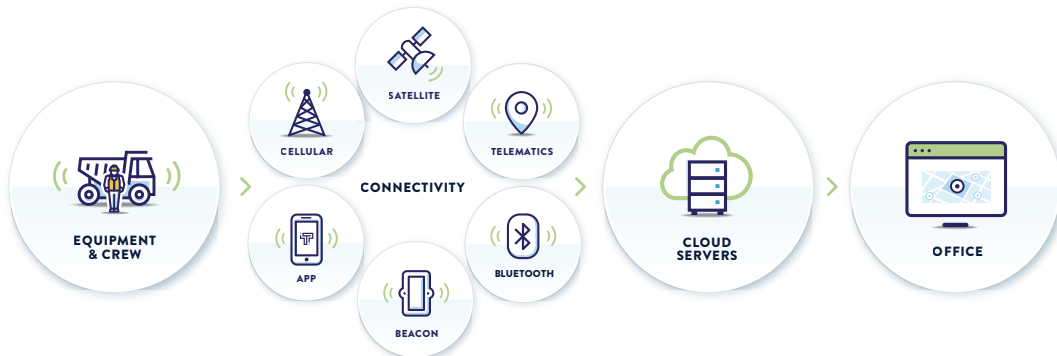

Trucking Schedule and Equipment Detail

- Integrated Manufacturer Equipment Tracking
- Geo-fence Detection/Awareness
- Beacons with Proximity Awareness
- Real-Time Adoption Equipment Chaining
- Receive and Schedule Field Requests
- Driver's Schedule
- Dispatch/Manage:
  - Equipment Moves
  - Dump Runs
  - General Trucking
- Real-Time Queue
- Role-Based Permissions & Notifications
- Load & Cycle Tracking
- Confirm Pickup/Delivery
- Safety Data
- Driver Data Including:
  - Harsh Driving
  - Real-Time Location
  - Idle vs Run-Time
  - Trip Reporting
- Integrated Inspections
- Maintenance Tagging
- "Follow" Equipment

## YOUR FLEET. DATA-DRIVEN.

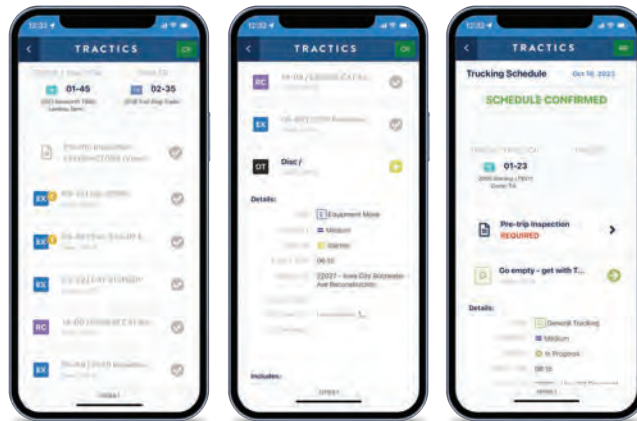

Utilize multiple forms of connectivity to facilitate real-time data exchange between equipment, crew, assets and office. This ensures efficient tracking, monitoring, and coordination of resources throughout a project.

Your equipment data is maintained in the platform and available as needed.

## KEEP 'EM MOVING

Simplify your fleet logistics, allowing dispatchers to efficiently dispatch and optimize your equipment moves and driver's schedules, ensuring that the right asset, arrives at the right place, at the right time.
